DOCKET SECTION

Dear Sir or Madam:

It is our opinion, that action should first be taken to substantially **reform** the *hours-of-service* regulations, **before** there is any significant overhaul or finalizing of the supporting documents provisions.

Hours-of-service reform should be a prime and priority issue, and once that has been resolved it may well be determined that the carriers can comply with the requirements without the significant expenses inherent in the proposed supporting documents rules,

Respectfully submitted,

David Hedgpeth
Vice President of Compliance and Safety
